## Jadis DPMC MkII

## **Specification**

Type Phono MM/MC

Gain 66 dB

Input  $1 \text{ MC/MM} : 48\text{K}\Omega, 1\text{K}\Omega, 300\Omega, 100\Omega$ 

Output From 0 to 5V variable output

Number of block 1

Tubes 4 x ECC83, 1 x EL84, 1 x EF86

Dimensions 45.5x32x12.5 cm

Consumption 30W Weight 11 kg

## Description

The DPMC is an MM/MC phono preamplifier with a level control. It uses 4 ECC83 for the preamp and for the RIAA correction. Tube regulated power supply ensures stability of this unit. The MkII version feature a new internal layout for better isolation and also allows the input impedance to be switched between  $48K\Omega$ ,  $1K\Omega$ ,  $300\Omega$ ,  $100\Omega$  for a better match with your cartridge. This unit is ideal to equip an integrated amplifier with a state-of-the-art phono stage that will allow you to rediscover your records collection.

## Listening

The DPMC delivered plenty of virtues [...]. The DPMC sounded really seductive. Think enhanced spatial perspective, and fatter, richer, and more liquid textures. The Jadis DPMC's tube signature us unmistakable. It romances the soul, and I for one could not resist its siren call. [...] It celebrates the music with
